

Join University of Idaho Extension for a

STOCKMANSHIP CLINIC

Featuring **Whit Hibbard**, 4th generation Montana rancher, editor of *Stockmanship Journal*, guest editorialist on stockmanship for *Drovers* and *On Pasture*, and teacher of Bud Williams' low-stress livestock handling.

April 16-19 | \$250 per person

**Nancy M. Cummings Research, Extension and Education Center
16 Hot Springs Ranch Road | Carmen, Idaho**

Join University of Idaho Extension for an introductory, hands-on low-stress livestock handling clinic. This clinic will be a combination of classroom and experiential learning. The classroom setting is ideal for covering a great deal of pertinent stockmanship material through PowerPoint and video presentation. The lessons learned in the classroom will then be practiced in the field on live cattle. This allows for real-time feedback from qualified instructors, better instilling the material covered in the classroom. Participants will gain a greater understanding of the principles, techniques and practical applications of low-stress livestock handling, equipping them with the tools necessary to begin implementing improved cattle handling practices on their own operations.

Please Register by April 5

Space limited to 15 participants
